

This year we are focusing our fundraising on providing much needed

Sensory Rooms

for both campuses.

Sensory rooms are specially designed environments that cater to the sensory needs of pupils, particularly those with autism spectrum disorder and other special educational needs.

They provide a tranquil space where students can retreat from the sensory overload of the school environment, reducing **stress** and **anxiety**.

They can also be effective at helping students with behavioural or sensory processing issues to calm down and relax so that they are better able to focus and learn when they return to their classroom.

We will be running various fundraising initiatives over the coming weeks and months. Your support as always is very much appreciated!
